

ESM Programmer Nano model

for Energy Saving Motor (ESM) based products

ebmpapst

The engineer's choice

ESM Programmer Nano by ebm-papst

Effortless programming of the two ESM selectable speeds
Ideal for field use

Features

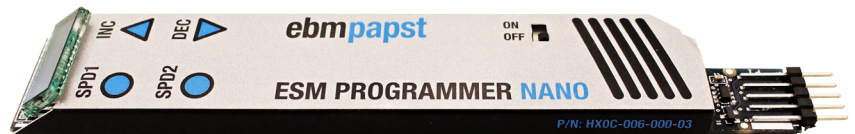

- Inserts directly into the fan's programming port
- Easy to read LCD display
- Battery operated
- No cables required

Compatibility

The Nano is compatible with most ESM-based fans available in the ebm-papst Energy Saving Fans catalog.* To program higher functions available on many ESM products, or numerous fans to the same setting, ask about our Hand Held programmer (P/N HXOC-003-000-02).

*Exceptions: The 24 VDC W1G200-EC, ACi4400 and iQ motor series are not programmable.
The Nano is not compatible with ebm-papst motors featuring MODBUS or ebmBUS interfaces.
Some customized ESM motors and fans are not programmable.
