**Highlights:**
- Backward curved
- 7-blade impeller, single phase motor
- Thermal overload protector (TOP) wired internally
- Mounting position: Shaft horizontal or rotor on bottom; rotor on top on request
- Condensate discharge holes: Rotor-side
- Ingress protection of IP44; dependent on installation and position

**Material:**
- Fiberglass reinforced composite
- Impeller: PA

**Direction of rotation:** Clockwise, seen on rotor

**R2E250-RB02-11 Curves**

Measurement: LU-131705

Air performance measured as per: ISO 5801, Installation category A, without protection against accidental contact.

Suction-side noise levels: $L_{WA}$ as per ISO 13347, $L_{PA}$ measured at 1m distance to fan axis.

The values given are valid under the measuring conditions mentioned and may vary according to the actual installation situation.

With any deviation to the standard set-up, the specific values have to be checked and reviewed once installed or fitted.

For detailed information on the measuring set-up, please contact ebm-papst.

R2E250-RB06-12 Curves

Measurement: LU-130856

Air performance measured as per: ISO 5801, Installation category A, without protection against accidental contact.

Suction-side noise levels: LwA as per ISO 13347, LwA measured at 1m distance to fan axis.

The values given are valid under the measuring conditions mentioned and may vary according to the actual installation situation.

With any deviation to the standard set-up, the specific values have to be checked and reviewed once installed or fitted.

For detailed information on the measuring set-up, please contact ebm-papst.
